

As a resident in the local community KLOVE provides us (my wife and I) with an alternative to secular radio stations. It provides us with christian programming the local stations don't provide. Since the FCC already mandates KLOVE be listener support and commercial free we support KLOVE financially because we feel that it is a benefit to us, our community and our young people. We also enjoy the fact that KLOVE is commercial free. After listening to it for awhile yourself you would find commercials on the stations quite annoying. Driving and visiting with people in our community I see a following and a support for KLOVE in our community. I see many vehicles with KLOVE stickers on their vehicles and also on their homes. Having KLOVE replaced by a LPFM broadcaster with other programming would be a setback for our community. I hated to see KLOVE go from a high power FM Station (94.5) to now a lower power station (89.3) a few years ago. When we travel we listen until we can't hear the words anymore and hope where we are going has KLOVE. Since we are a predominate christian community and country and the service provided by KLOVE is positive, wholesome and encouraging programming, it is in the public's best interest to have it in the community here and around the world.
